III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be nonobvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos.: **16 and 20**

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☒ no international search report has been established for said claim Nos.

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

☐ the written form has not been furnished or does not comply with the standard.

☐ the computer readable form has not been furnished or does not comply with the standard.

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-15, 17-19	YES
	Claims		NO
Inventive step (IS)	Claims	1-15, 17-19	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-15, 17-19	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

NOVELTY (N) claims 1 and 2

The subject matter of the independent claims 1 & 2 are new in terms of the relevant state of the art [Article 33(2) PCT], since none of the documents cited in the International Search Report discloses the combination of all features set out in each of the claims 1 and 2.

Claims 3-15 and 17-19 are dependent on claims 1 & 2 and are concerned with particular embodiments of the wrench according to claims 1 & 2 and thus also meets the requirement of PCT Article 33 (2).

INVENTIVE STEP (IS) Claims 1, 2-15 and 17-19

The claimed wrench provides means of

- (a) Increasing the mechanical advantage as required.
- (b) easy removal of the jaws from the article gripped.
- (c) Varying the distance between the gripping portions to suit different sized articles.

For the above reasons claims 1, 2-15 and 17-19 are considered to involve an inventive step and therefore satisfy this criterion set forth in PCT Article 33(3).

INDUSTRIAL APPLICABILITY (IS) claims 1, 2-15 & 17-19

The invention defined in claims 1, 2-15 & 17-19 satisfies the criterion set forth in PCT Article 33(4).

VII. Certain defects in the international application

(54) Title: WRENCH

(57) Abstract: A wrench (10) including first (11) and second (12) jaw members each having first and second gripping portions (23) for gripping an article to be rotated about a work axis and a leverage portion spaced from the gripping portion; one or two handles, the one handle (13) being connected to the leverage portion of the first jaw member for pivoting movement relative thereto about a leverage axis parallel to the work axis and the other handle (29) (where provided) extending from the leverage portion of the second jaw member in the plane of rotation of the first handle; engagement means on the handle for movement therewith for engagement with the leverage portion of the second jaw member to urge the first and second leverage portion apart, and connecting means (14) connecting the first and second jaw members and holding them in opposed disposition, the connecting means being operatively interposed between the respective opposed gripping portions and the opposed leverage portions and being arranged to allow pivoting of the jaw members with respect to each other, the connecting means being adjustable in length to vary the distance between the gripping portions to suit different sized articles. Preferably, the connecting means is in pivotal engagement with at least one jaw member, the connecting means is in the form of a length adjustable nut and bolt assembly, the nut being in the form of a cylindrical pin having a diametral bore for receiving a length adjustable bolt comprising a sleeve (26) and a screw (27) in threaded engagement with a threaded bore extending axially into the sleeve.

INTERNATIONAL SEARCH REPORT

International Application No.

PCT/AU 00/01173

Box I Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:

2. ☒ Claims Nos.: 16 and 20
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

Box II Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:

4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.
